## THE JUMPING BEAN 'BURRITO SHACKS'

**Jumping Bean Burrito is a fresh and vibrant new company run by two young guys who are passionate about food and really care about the company we've created. We love going to music festivals and the idea for the company actually came to life while we were working at Secret Garden Party a few years back.**

We love the feel of your festival and we really want to get into catering the festivals like SGP, Glade and Shambala. With this in mind, we have recently built the 'Burrito Shacks' which are total onsite build ups with wooden frontages designed to compliment our larger catering trailers but geared towards trading at the more exclusive, low-key and up-market festivals like SGP.

Coming in to our third season on the festival circuit we pride ourselves on knowing exactly what it is that organisers and festival goers are looking for and this means we deliver the freshest and tastiest food at every event.

# WHAT IS JUMPING BEAN BURRITO?

## OUR ATMOSPHERE

- We play great tunes all day, every day – we get our team and our queue **JUMPING**
- Our staff love festivals as much as we do. We hate seeing sad faces on food wagons so we make sure our team enjoy working for us

## WE'RE FAST

- Our revolutionary right to left serving system means that we can serve **high numbers** of customers at **speed** with no loss of **quality**
- Customers work their way down the serving line, meeting all our smiling staff and choosing exactly what they do or don't want to go into their burrito
- Everyone gets a **fresh custom burrito**, made exactly the way they want it, **every time**

## WE'RE ECO-FRIENDLY

- **Wind turbine** and **solar panels** on roof generate electricity to offset our energy consumption
- All packaging is **biodegradable** and made from **recycled** materials
- Our refuse is separated into **glass, metal, paper** and **organic** to facilitate the recycling process

## HUNGARIAN HOT WAX AND FRESH CORIANDER

- We grow our own **Hungarian Hot Wax Chillis** and **coriander**
- We have **hanging baskets** on the shack which the chillis and coriander are planted in
- When we need either plant we just pick them from the basket – you can't get **fresher** than that

## FRESH FOOD AND LOCAL PRODUCE

- We pride ourselves on using the **finest ingredients** in our food, never cutting corners or using sub-standard produce
- We use **local suppliers** for our stock when possible. This ensures we only use fresh ingredients in our burritos.
- **Traditionally reared** and **organic** birds for our chicken breasts – no battery farming
- **British** minced beef with less than **5% fat**
- Wherever possible we use **Fair-trade** products and ingredients sourced from **sustainable** areas
- We're more than happy to use **SGP** suppliers wherever possible

Our aim as a company is to have the friendliest staff, nicest food and best music on the festival circuit and get everyone, including ourselves, jumping to our banging tunes whilst we make our fantastic food with a smile.
